CLASS 9 · JEE ADVANCED · INSTITUTE TOP 10 VS OUR TOP 10

Pragya G9 (EXI) Achievers

Part Test-1 · Paper 2 · where our toppers fall behind the institute's toppers

Exam date 09 Oct 2026
Campus HYD/Nallakunta DD Colony
Compared institute top 10 vs our top 10

On average the institute's top 10 scored ≈ 114.5 and our top 10 scored ≈ 110.4 – a gap of ≈ 4.1 marks per student: 5.4 in Physics and 1.3 in Chemistry.

Physics 81% of the gap | Chemistry 19% of the gap

7 of the institute's top 10 are our students (program rank 1, 2, 3, 4, 6, 9, 10), so this compares the institute's other 3 toppers with our next 3. Scores are rebuilt from each question's right / wrong / skipped counts with the paper's marking; approximate (≈) because multiple-correct questions give partial marks – our official average is 105.9.

institute top 10 – average score

≈ 110 / 176
our top 10 – average score

3 questions
where 2+ more of the institute top 10 got it right

3 questions
where 2+ more of ours got it right

1 Subject by subject

Average marks per student, and how the answers split into right, wrong and skipped. ■ Institute top 10 ■ Our top 10

SUBJECT	AVERAGE SCORE		GAP	RIGHT	WRONG	SKIPPED
Maths out of 60	≈ 47.1 ≈ 49.7		−2.6 per student	80% vs 83%	16% vs 14%	4% vs 3%
Physics out of 60	≈ 35.7 ≈ 30.3		5.4 per student	61% vs 53%	29% vs 35%	10% vs 12%
Chemistry out of 56 = 60 minus Q45 (4)	≈ 31.7 ≈ 30.4		1.3 per student	59% vs 56%	39% vs 42%	2% vs 2%

"Out of" = the subject's marks on this paper minus the questions left out by the final key (marks of each left-out question in brackets). Percentages are of all answers in that subject (questions × students), institute first, ours second.

Key takeaways

1. **7 of the institute's top 10** are our own students (program rank 1, 2, 3, 4, 6, 9, 10), so the two groups mostly overlap: at most 3 answers can differ on any question, so the gap line is set at 2 instead of 4.
2. **Physics** is where we fall furthest behind: ≈ **5.4** marks per student (81% of the total gap).
3. **3 questions** were answered correctly by at least 2 more of the institute's top 10 than ours. Biggest: Q31 (9 vs 6), Q34 (6 vs 4), Q48 (4 vs 2).
4. We also got more wrong in **Physics**: 35% of answers wrong vs 29% – accuracy, not just coverage.
5. We are **ahead in Maths**: our top 10 averaged ≈ 2.6 marks more per student than the institute's top 10.
6. Where we did better: Q5 (10 vs 8), Q13 (9 vs 7), Q42 (7 vs 5).

2 Question-by-question gap

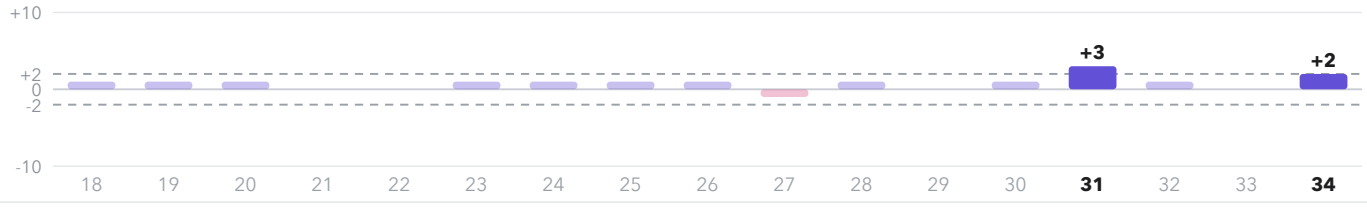

For each question: how many more of the institute's top 10 got it right than ours. Bars above the line = the institute did better; below = we did better. Gaps of 2+ (dashed line) are labelled.

Institute top 10 got more right Our top 10 got more right ---- Gap of 2

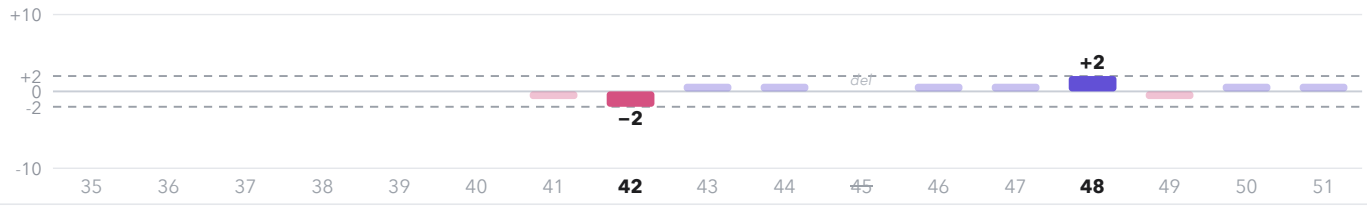

Maths — **0** questions with a gap of 2+ · gap ≈ **-2.6** marks per student

Physics — **2** questions with a gap of 2+ · gap ≈ **5.4** marks per student

Chemistry — **1** question with a gap of 2+ · gap ≈ **1.3** marks per student

3 Chapter gaps

Average marks per student on each chapter's questions, institute top 10 vs ours. Subjects are ordered from the biggest gap to the smallest; within each subject, largest chapter gap first.

CHAPTER	QS	INSTITUTE VS OURS	GAP PER STUDENT		GAP QUESTIONS
1. Physics gap ≈ **5.4** marks per student · **2** questions with a gap of 2+					
Friction	5	6.2 vs 4.6		≈ 1.6	Q31
Circular Motion	4	10.4 vs 9.0		≈ 1.4	–
Work, Energy & Power	4	5.3 vs 4.3		≈ 1.0	Q34
Laws of Motion	3	10.6 vs 9.6		≈ 1.0	–
Momentum & Collisions	1	3.2 vs 2.8		≈ 0.4	–
2. Chemistry gap ≈ **1.3** marks per student · **1** question with a gap of 2+					
Hydrocarbons	5	8.8 vs 7.4		≈ 1.4	–
Isomerism	2	2.6 vs 2.6		≈ 0.0	–
General Organic Chemistry	9	20.3 vs 20.4		−≈ 0.1	Q48
3. Maths gap ≈ **-2.6** marks per student · **0** questions with a gap of 2+					
Functions	6	18.0 vs 17.3		≈ 0.7	–
Trigonometric Equations	5	11.5 vs 12.8		−≈ 1.3	–
Inverse Trigonometric Functions	6	17.6 vs 19.6		−≈ 2.0	–

4 Biggest gaps – question list

Questions where at least 2 more of the institute's top 10 got the right answer than ours, one table per subject. The cropped question for each is in section 5. With 7 of the 10 students shared, at most 3 answers can differ on any question, so the line is set at 2 instead of 4.

Maths

No question with a gap of 2+

Physics

2 questions with a gap of 2+

Q	CHAPTER – WHAT IT TESTS	TYPE	INSTITUTE RIGHT	OURS RIGHT · WRONG · SKIPPED	GAP
Q31	**Friction** – Friction on a block at rest inside an accelerating cube	Paragraph · +3 / 0	9/10	6/10 · 2 · 2	+3
Q34	**Work, Energy & Power** – Work by conservative forces from the U-x graph	Paragraph · +3 / 0	6/10	4/10 · 4 · 2	+2

Chemistry

1 question with a gap of 2+

Q	CHAPTER – WHAT IT TESTS	TYPE	INSTITUTE RIGHT	OURS RIGHT · WRONG · SKIPPED	GAP
Q48	**General Organic Chemistry** – Counting electrophiles	Paragraph · +3 / 0	4/10	2/10 · 8 · 0	+2

Where our top 10 did better

- **Q5** 10 vs 8 right
- **Q13** 9 vs 7 right
- **Q42** 7 vs 5 right

How to read this report. "Institute top 10" = the *Top 10 Students* rows of the institute's question-wise R/W/U sheet for this test (program ranks 1–10 in Pragya G9 (EXI) Achievers, all campuses). "Our top 10" = this campus's top 10 by program rank. A gap of +5 on a question means 5 more of the institute's top 10 got it right than ours.

2 questions, largest gap first
cropped from the question paper

Q31

Friction – **Friction on a block at rest inside an accelerating cube**

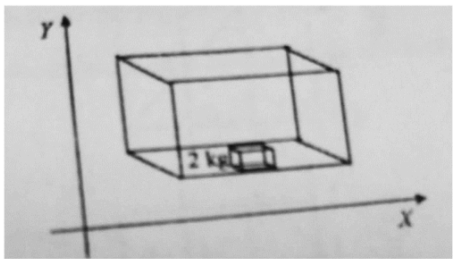

Institute top 10: **9 right**, 0 wrong, 1 skipped · Our top 10: **6 right**, 2 wrong, 2 skipped

Physics · Paragraph · marking +3 / 0

Gap +3

PARAGRAPH-I

A solid block of mass 2 kg is resting inside a cube as shown in figure. The cube is moving with a velocity $\vec{V}=\left(5t\hat{i}+2t\hat{j}\right)m/s$. Here 't' is second. The block is in rest w.r.t cube and $\mu=0.5$ between block and surface of cube. $\left(g=10m/s^2\right)$

31. Force of friction acting on block is _____ N

Ours wrong: Bandhav Praputh, Pamunugundla Smaran

Ours skipped: Ramini Havisha, Rudroju Rohan Chary

Q34

Work, Energy & Power – **Work by conservative forces from the U-x graph**

Institute top 10: **6 right**, 4 wrong, 0 skipped · Our top 10: **4 right**, 4 wrong, 2 skipped

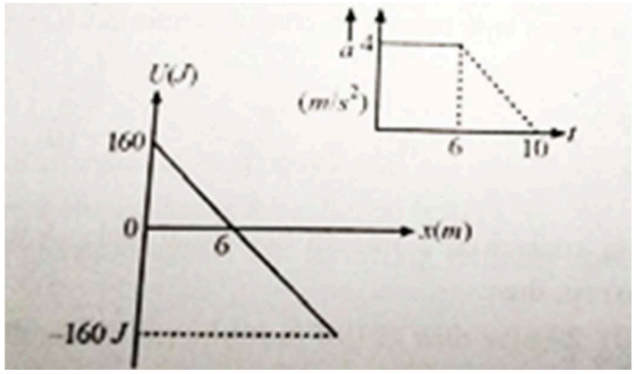

Physics · Paragraph · marking +3 / 0

Gap +2

PARAGRAPH-II

A particle of mass 1kg is moving along x-axis its velocity is 6m/s at x=0. Acceleration versus time and P.E versus displacement of particle are shown $\left(g=10m/s^2\right)$

Acceleration a is in $m/\sec^2$ b

34. Work done by conservative forces _____ J

Ours wrong: Nandimandalam Loukhya Reddy, Ankam Advaith, Bashaboina Sai Saketh, Pamunugundla Smaran

Ours skipped: Rudroju Rohan Chary, Bandhav Praputh

Chemistry – biggest gaps

1 question, largest gap first
cropped from the question paper

Q48 **General Organic Chemistry** – **Counting electrophiles**

Institute top 10: **4 right**, 6 wrong, 0 skipped · Our top 10: **2 right**, 8 wrong, 0 skipped

Chemistry · Paragraph · marking +3 / 0

Gap +2

PARAGRAPH-I

Electrophiles and nucleophiles are fundamental concepts of organic chemistry playing crucial roles in various reactions. Electron loving species that accept electron pairs to form covalent bonds are electrophiles, Nucleus loving species that donate electron pair to form covalent bonds.

48. How many of the following are electrophiles

A) Br^+ B) $\boldsymbol{Na}^+$ C) CN^- D) BF_3

E) $BeCl_2$ F) NH_2^- G) SH^- H) OR^-

Ours wrong: Prit Raj Kushwaha, Geetansh Praveen Reddy Vengala, Ramini Havisha, Nandimandalam Loukhya Reddy, Ankam Advaith, Bashaboina Sai Saketh, Bandhav Praputh, Pamunugundla Smaran

Ours skipped: –
